2,600 The Stock movement continues to be strongly upward, and nearly the whole list sympathized to-day. The bull speculations, which commenced in Central and Reading, and were successful, have naturally attracted the attention of operators to other stocks, and under this general activity and buoyaney the boar element of the street was swept away, the shorts bought in, and the two factions appear to have coalesced to put the market up. There was to-day, however, notwithstanding the apparent strength of the market, some disposition shown on the part of bear operators to commence putting out a short line again, and of the time sales, 7,500 shares, at the morning Board, 4,300 shares were onsellers' option. Of course, Bases. Of Capital Discounts Specie much of this is only the selling back of stock on time which had been bought for cash to fill contracts, but there is evidently also in the sales the germ of a new short interest. There is also rather Manhattan Merchants' Mechanics' more appearance of buying for outsiders, but the amount is not important. The speculation is still almost entirely confined to the street operators and the speculating brokers of other cities. The largest

advance to-day was in Michigan Southern Guaranteed. although the sales were moderate compared with some other descriptions. The market opened at 48, and advanced to 50 bid, an improvement of 21 on Saturday's rate. There was street talk of a dividend during the year, but we doubt if the Company entertain any intention of making a dividend until the floating debt is fully disposed of. The common stock was also firmer, and went to 24]. The improved condition of the traffic of this road is attracting attention to it. New-York Central was strong, and between the Boards touched 841, but afterward at the Second Board reacted to 83], closing at 84. Reading was very scarce, and from 501 on Saturday the market, urder purchases by the shorts, advanced to 52, closing at 512. In Eric there is no movement of importance, but the quotation was strong. The election of Directors takes place to-morrow, and attracts more attention than usual. It has been generally allowed to go by default, the stockholders taking but little interest in it. There will be no important changes, although an attempt to get up an opposition ticket has been made. The Western shares were buoyant in the morning, but prices were not quite sustained at the 66] down to 65]. Galena was firm at about 81] 285. The receipts of September are now stated to be only \$161,000 against \$250,000 in September, 1857. Toledo improved to 33), closing dull. The traffic of the road is quite satisfactory to the managers in view of the depressed state of business. Pacific Mail again im-proved and closed at 101. The purchase of the At-

The blanks are such as the Bank used a number of years since, and the name signed as that of Teller is not the name of any one connected with the Bank. The signature of the Cashier is a poor imitation of the original.

Albert II. Nicolay's regular daily auction sale of Bonds and Stocks will take place to-morrow (Tuesday), at 124 o'clock, at the Merchants' Exchange.

There is an active demand for New Government Loan and Treasury Notes, and the quotations are improving. The sales of Government 5s are about \$125,000, at 104, closing rather in demand at that price. The 5 P cent Treasury Notes, which are alnost entirely out of market, have been sold to-day loans, and the contraction of this item is no doubt a at | # cent premium; about \$150,000 of 4] # cents at 1-10 #4 premium, and 42 P cents at 1 #4 premium. At par, a very large amount of 41 P cents could be more than it received, and the remainder from the placed.

The bullion in the Bank of France now stands at about \$120,000,000-a far higher sum than was ever before held by that establishment, and more than \$9,000,000 in excess of the largest total ever col-lected in the Bank of England. At the commencement of the present year the Bank of France held less than \$50,000,000, and the influx in nine months has therefore been \$70,000,000. At the Bank of England, the total, at the beginning of the year, was \$52,000,-000, and it is now more than \$95,000,000. The highest sum it ever possessed was \$111,000,000 in July, 1852.

Lane, sent out to examine the affairs of the Company, was submitted. They express their satisfaction of the administration of Mr. Gest, the Receiver. An adjourned meeting of the bondholders is called for Wednesday next at the office of Messrs. Clift & Lane, No. 44 Nassau street, when a new financial plan will be presented, the outline of which is as cial plan will be presented, the outline of which is as follows: A decree of foreclosure to be immediately entered into and held in abeyance until the stockholders shall have time to complete the road to the Hamilton and Dayton line, near Glendale, and in the mean time the road to pass into the hands of an Executive Committee, composed of Theo. the same legal priorities that each issue now carries.

A meeting of the bondholders of the Covington and inst. Of the \$1,000,000 bonds outstanding, \$976,000 were represented. Mr. Lanier of New-York represented about \$600,000 owned in this vicinity. A series of resolutions, offered by Mr. Lanier, was unanimously adopted, under which a committee, consisting of Messrs. Henry Hanna, Wm. Errest, W. B. Smith and Sheemaker, was appointed to act in concert with a committee of three appointed in New-York, in carryirg out the instruction of the bondholders. It will be the duty of this committee to confer with the Board of Directors of the Company, and it is hoped that a satisfactory arrangement may be effected, by which the necessity of a resort to legal proceedings may be

obviated.

The Dubuque Times says:

Belew will be found the circular of ote of our most respectable banking houses. We learn that they have provided for the prompt and sure payment of their entire indebtedness, and that no one will lose a doilar by them. It is a serious blow to our commercial interest to have these gentlemen retire from active service in this crisis, but better now with honer and credit to themselves and friends, than to hold on and bereafter bring ruin and idiasster to these who may confide in them. The house chosen as their successors is one of the first standing in this country, and though we may regret the cause that led the successors of the long-established house of F. S. Jessup & Co. to take the step, we are still prepared to believe that such men as composed the retiring firm will, while with us, be found in active and useful labor:

To OUR FRIENDS AND FATRONS.

The undersigned, having determined to retire from the banking business, have turned over their collection notes to their friends, Gelpeke, Whislow & Co., where the bills due this day may be paid.

Having selected a highly respectable house to take charge of our collection business, we cordially recommend them to ser friends and depositors as entirely responsible and familiar with banking, and their connections are such as give them peculiar advantages.
